

Industry 4.0 in one place – discover the HEITEC Solution Center

The HEITEC Solution Center is the perfect entry point to the innovative HEITEC ecosystem. The IIoT platform bundles your applications in one central location to increase productivity and efficiency. The white-label platform can be customized to meet your specific needs. Centralized access to all applications simplifies daily tasks for users and enables a more agile and efficient way of working.

The HEITEC Solution Center is the single point of contact for your HEITEC applications. The HEITEC Solution Center also integrates browser-based third-party applications via an interface. Single sign-on eliminates the need to log in to each application and greatly improves usability.

HEITEC Solution Center – your solutions platform

Centralized Access

The clearly arranged landing page leads the user to each embedded program. Browser-based third-party programs can also be integrated.

Fully customizable

Customize the user interface to match your company's corporate identity.

Visualization

Visualize data with full Grafana integration. Display data from different sources in attractive charts, graphs and dashboards.

User Management

Single sign-on is used to log in to the various programs. Only one application is needed for the different applications.

Condition Monitoring

In Condition Monitoring, Grafana visualizes the data from each machine. You can intuitively set up dashboards to visualize your data according to your needs.

Asset Management

This is where you manage your various assets, from sensors to entire plants.

Tenant Management

The HEITEC Solution Center has integrated tenant management so you can offer digital services to your customers.

Ready for the future: our smart factory solutions
